Let us put our 35+ years of audio/video recording experience to work for you.

A COMPLETE MANAGEMENT SOLUTION FOR YOUR DIGITAL RECORDS
Easily manage your record sessions with this A/V software package.

AutoLog 7

This user-friendly session-logging software allows you to control the JAVS Recorder and the JAVS Centro processor. Easily start and stop multiple recorders and create a log of events for each recording session complete with date and time stamp.

Publisher 7

Create a catalog of session files, then publish them to a new location with this software. Control how your recordings are published by choosing the desired output for your files.

Server 7

This centralized database management solution allows you to connect all of your JAVS Premier locations. Server 7 is an enterprise solution that allows for greater management of redundancy, failover, and backup.

Scheduler 7

Scheduler 7 gives you even more control of the courtroom. With this software, you can schedule sessions for any date and at any location using a network-connected computer. Automatically start and stop a recording at a specific time, reschedule a session, or copy schedules to another date with just a few clicks.

Viewer

The complimentary session-viewing software allows you to open all previous JAVS log and media files. Play, pause, fast forward, and rewind a session, and monitor and control audio levels. You can also view any events created in AutoLog 7.

Bookshelf 7

Bookshelf 7 makes archiving easy. It automatically copies recordings from Recorder 7 to the Bookshelf 7 server. Software can be set to begin the archive process directly after recording or at specific time of day. Once archived, users can easily find any recording from any courtroom.

Additional solutions include SiteManager 7 to set up and manage site and user information for all recording locations and MRA 7 to be able to log in to multiple locations from a single computer.

Ready to learn more about how JAVS Suite 7 can help you capture an accurate digital record for your justice needs?
